

REQUEST A QUOTE:

It is our goal to provide quotes within 24 hours, but please allow up to 72 hours on more complex requests. Our lead times are approximately 4 weeks, once we have all the information needed to complete a quote. We cannot provide a quote without a specific image to base the model on. For most work we will need a reference image, sketch, photo or CAD drawing. Additional image examples can be found on website "Vector Art 3D download."

PRODUCT INFORMATION:

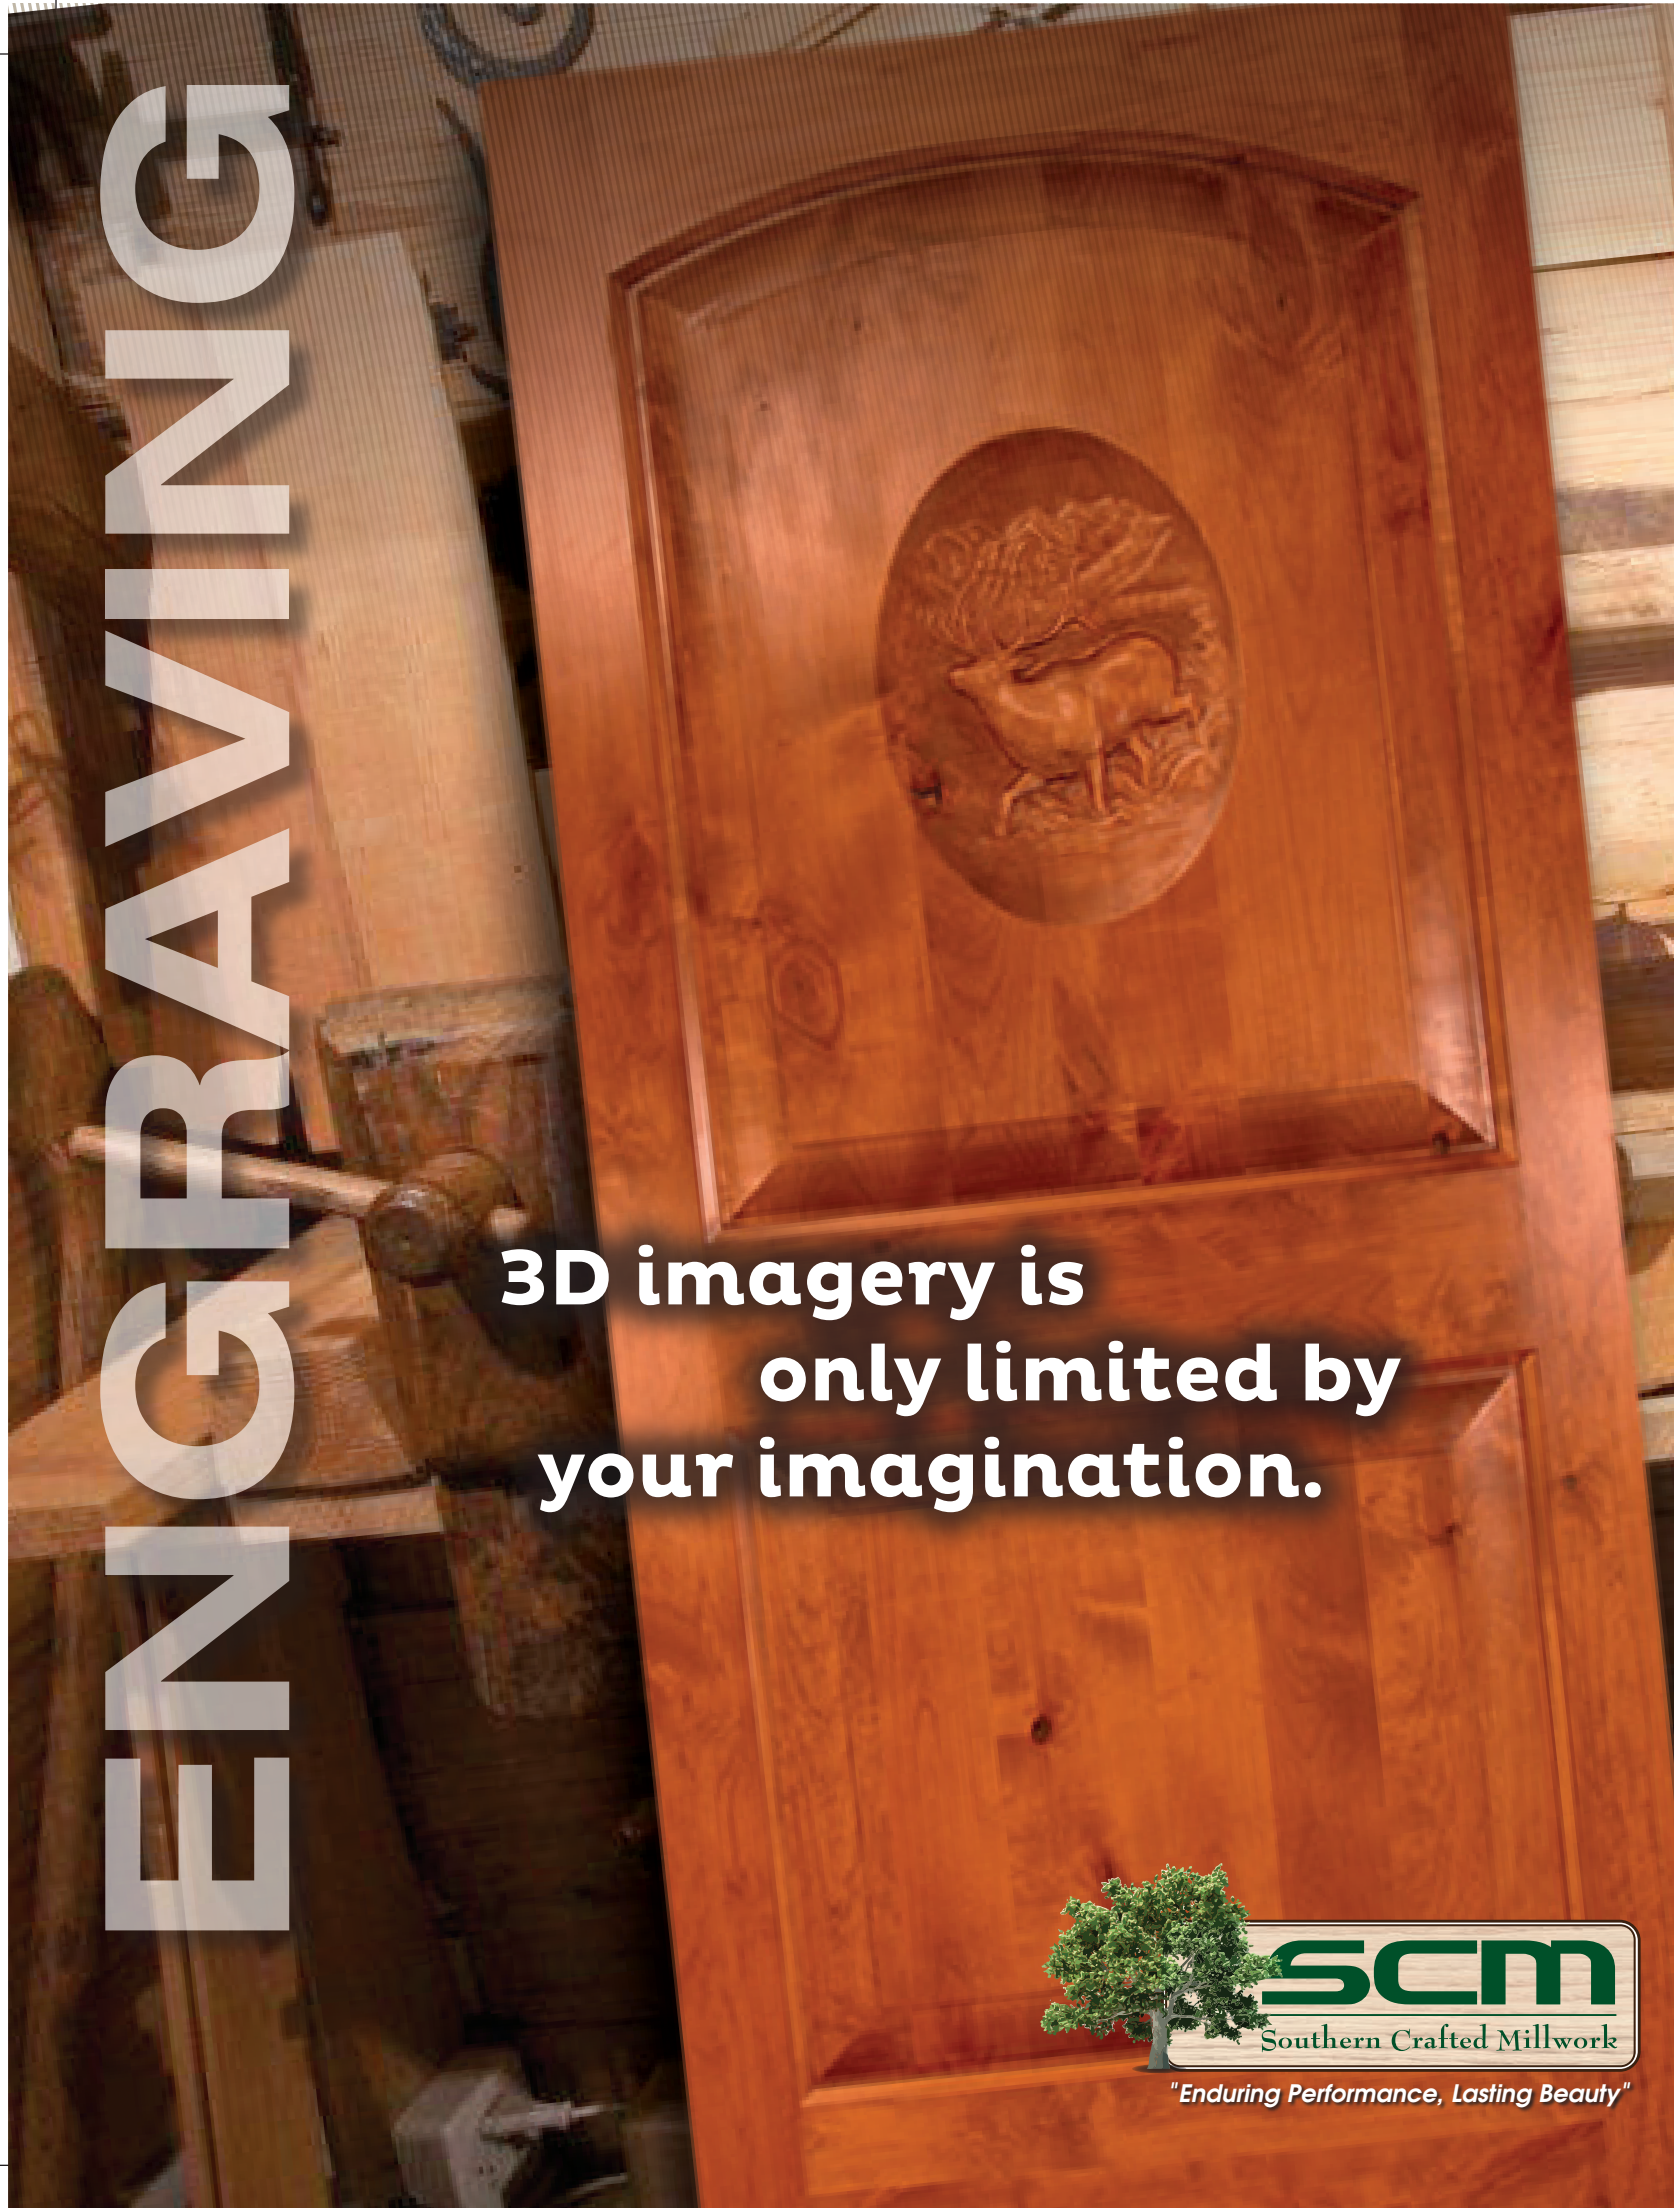

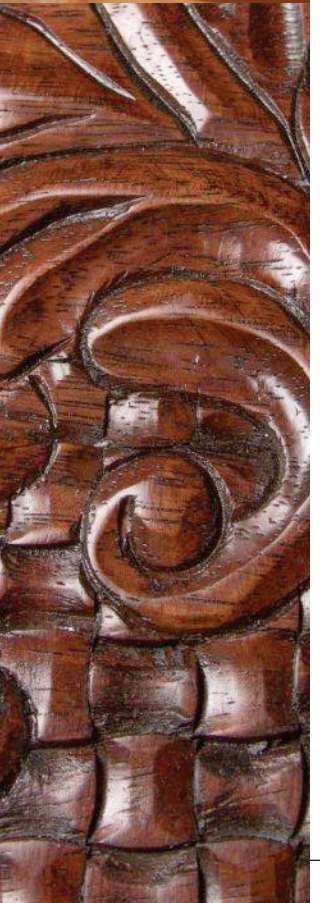

We will need the actual width, height, depth and quantity of the part or parts you are asking us to produce. Any additional detail you can provide will help us in finalizing your quote request.

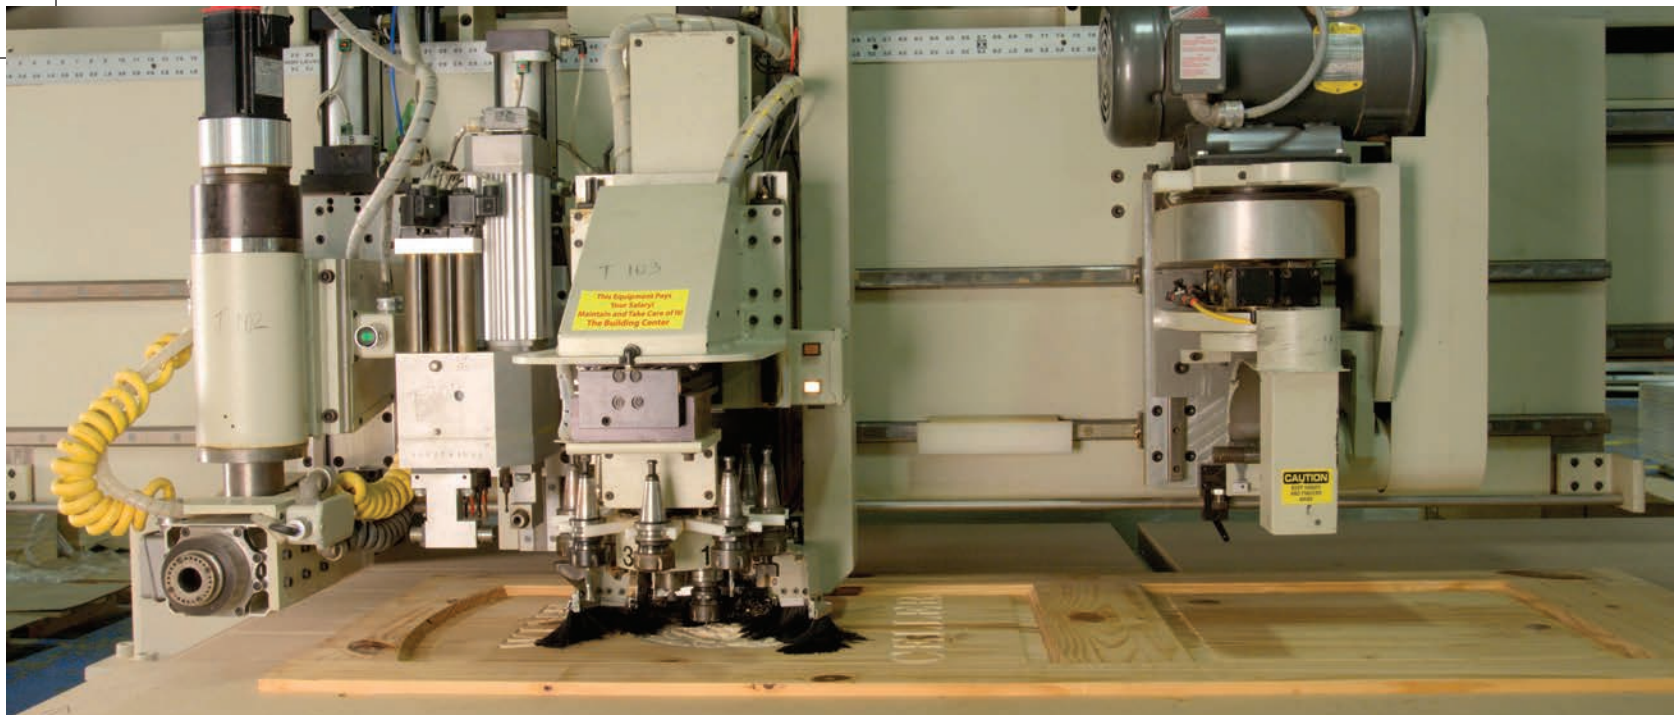

SOUTHERN CRAFTED MILLWORK

ENGRAVING

3D imagery is only limited by your imagination.

Southern Crafted Millwork is proud to offer VECTOR ART 3D, which provides relief style clip-art for computer controlled routing and engraving. Vector Art can create dimensions in raised, dished or recessed with a hand carved edge. We offer high quality imagery that can be produced on wood, wood composite or PVC. Vector Art 3D takes the cost and complexity out of producing decorative carved parts through a software program designed to produce exacting images on a CNC router. What Vector Art 3D can create, is limited only by your imagination.

The images shown on the following pages are examples of our product capability. These images are only a few examples of what we can create with Vector Art 3D.
